PROFILE

Odoo / ERP Developer with professional experience customizing and maintaining Odoo 14 workflows across Accounting, Inventory, Purchase, Sales and reporting. Strong in Python, PostgreSQL, XML, QWeb, JavaScript and the Odoo ORM. Independently developing Texarium ERP, a personal learning project on Odoo 18 Community, to explore reusable approvals, integrated business workflows and custom reporting.

PROFESSIONAL EXPERIENCE

Odoo Developer | HashMicro

Feb 2024 - Present | Remote

- Develop and customize Odoo solutions for business workflows, operational controls and ERP integrations.
- Work with Python, XML, QWeb, JavaScript, PostgreSQL and the Odoo ORM to deliver maintainable modules and troubleshoot production issues.
- Support Accounting, Inventory, Purchase, Sales, reporting and multi-company processes.

Odoo Developer | PT. Sama Sama Sukses

Aug 2021 - Jan 2024 | Tangerang, Banten

- Customized Odoo 14 modules, views, reports and workflows for operational requirements.
- Applied Odoo and CSS development skills to improve ERP usability and workflow consistency.

Research and Development Engineer | PT. SuryaSukses Adi Perkasa

Feb 2021 - Jul 2022 | Cibitung, West Java

- Developed product concepts, product designs and pallet drawings for research and development needs.

Business areas	Accounting, Inventory, Purchase, Sales, approvals, reporting, multi-company and multi-currency workflows
Additional	HTML/CSS, Laravel, Filament, REST/API concepts, Windows/Linux

EDUCATION

Universitas Mercu Buana

Bachelor Degree, Information Technology | 2015 - 2020

Projects & Technical Contributions

Christian Oliver | Odoo / ERP Developer

PERSONAL PROJECT

Texarium ERP

Odoo 18 Community | Python | PostgreSQL | OWL / JavaScript

An independent learning and portfolio project developed and tested locally. Separate from professional client implementations.

- Developed a reusable Approval Matrix with employee hierarchy, sequential Manager and Director decisions, minimum approvals, decision history and a central approval dashboard.
- Integrated Purchase, Inventory, Quality Control, vendor billing, payments and local bank statement reconciliation; verified a scenario receiving 20 units, releasing 18 and returning 2.
- Built a custom Stock Ledger Report with opening balances, movements and ending quantities and valuation.
- Implemented cash advance settlement, petty cash, expense integration and purchase budgets with planned, committed, actual and available amounts.
- Configured Indonesia and Singapore companies and branches; validated finance and budget scenarios across eight company and branch contexts.
- Customized login, navigation, themes and dashboards; prepared video walkthroughs, including actual approval actions through the UI.

SELECTED PROFESSIONAL CONTRIBUTIONS

Prior Odoo 14 work across professional roles; distinct from the Odoo 18 personal project above.

Accounting & Finance

Payment and reconciliation customizations for partial payments, exchange rates, FX gain/loss and bank fees; currency-aware stock valuation; Anglo-Saxon accounting, invoice amount-due fixes, loan reclassification, down payments and VAT handling.

Inventory & Warehouse

Multi-UoM and lot-based counting, quantity conversion and rounding; stock reservation and traceability; picking approvals, backorders, FIFO valuation fixes, lot propagation from Purchase, RMA and returns.

Purchase, Sales & Multi-company

Vendor pricelists, supplier taxes, tax-aware purchase pricing, category-based product/vendor access, RFQ/PO numbering, Sales product filtering and intercompany Purchase-to-Sales automation.

Workflows, Dashboards & Reporting

Multi-level approvals with feedback and audit tracking; receiving PLAN-versus-ACT dashboards; product part-number search; HR assessment and time-off views; work orders; QWeb/PDF reports and approval notifications.

Maintenance & Additional Experience

Production troubleshooting involving ORM, XML, QWeb, access rules, PostgreSQL and module upgrades. Additional design and print work included packaging designs, color matching and print-software calibration.
